Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1859 Excerpt: . larger sector, on the contrary, is decidedly brighter towards its outer edge, and terminates rather sharply for such an object. Mr. Carrington having suggested to me to observe the angles of position of a series of tangents to the curve formed by the eastern edge of the tail, I endeavoured to do so; though my apparatus is not well suited to such an observation, for which a veiy low power and large field would be more appropriate than those ordinarily belonging to the parallel wiremicrometer. It is essential that the points at which the wire is made, a tangent should be pretty accurately determined; but this was not very easy to do. The mode which struck me as the most practicable was, to fix on certain differences of north polar distance from the nucleus. Having, therefore, brought the nucleus to the cross-wires in the field, I set the declination circle half a degree northward, and observed a tangent; and so on, at intervals of half a degree. But I found that, after the fourth setting, the edge of the tail became so diffused, that the observations could not be carried further with any certainty. The results were as follows; power 96: --o / ohm At o 30 north of the nucleus, pos. of tangent =-218-2 G.M.T. = 8 23 1 o, 216-2, 8 31 1 3. - . 2 3 i - 8 33 20, 212-3 8 36 The tail reaches to-night to the triangle formed...
