Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

THE SILENT LANDSCAPE: THE SCIENTIFIC VOYAGE OF HMS CHALLENGER

Joseph Henry Press. Paperback. Book Condition: New. Paperback. 304 pages. Dimensions: 8.3in. x 5.3in. x 0.8in. In 1872 HMS Challenger set sail from Portsmouth, England, to map and sample the ocean floor. This marked the birth of modern oceanography. By retracing Challengers extraordinary voyage, we view our underwater landscape anew focusing on what 21st century science is now able to add to this incredible story. The oceans make up more than two thirds of the Earths surface. But they are as mysterious for what they conceal beneath their surfaces as they are familiar for their ubiquity. Deep below the susurrus swell of waves lies an alien world that we have only begun to explore. The quest to know more about this secret domain began in earnest in the late 1800s. In 1859, Charles Darwins book On the Origin of Species by Means of Natural Selection set the scientific world abuzz with its radical theory of evolution, and sparked a feverish desire to know more about the workings of nature. Scientists became increasingly convinced that the ocean floor could provide proof or refutation of Darwins theory of natural selection. They believed that the ocean floor was a haven for life that had long been extinct on land and that obscure fossil evidence culled from the depths could provide us with information on species that no longer existed topside. So an expedition was specifically designed and undertaken to investigate the natural history and geology of the ocean floor. With its emphasis on locating and retrieving fossil records that would test the new theory of evolution, Challengers voyage was nothing less than a mission to choose between God and science. Sailing three and half years and 69, 000 nautical miles through burning tropical heat waves and stupefyingly cold Antarctic seas, and suffering further privations...
